Distance on one charge, km	10	20	30
Weight, kg	50	55	60
Dimensions (L x W x H), mm	1900 x 400 x 1300		
Max speed, km/h	25		
Price, \$ (EXW)	3.699	3.899	4.399

Terms of production: 1 month

The price is shown without taking into account the cost of border import duties and delivery costs. Delivery costs and fees are calculated based on your location. Please contact your manager for the calculation.

Main features of the models

- An electric snow scooter is not a vehicle, it is a sports projectile like an off-road motorcycle or bicycle. It is not intended for travel on public roads. You can only use it in off-road conditions. If you have any additional questions regarding registration or permits for use, you should check with your local authorities.
- Five speed levels from the 5 km/h up to the maximum speed. Cruise control is available from the 8 km/h. "Walk mode" is available (5 km/h).
- LCD monitor with the backlight shows current speed, distance, battery charge, engine temperature and other.
- Easily removable 60 volts battery with Li (MnCoNi) O2 technology. The battery should charge only in the "plus temperature" conditions.
- Painting - two RAL colors for the entire bike available.
- Front suspension 50-100 mm.
- Includes a standard charger kit (charging time is ~ 3-4 hours). More powerful charger is available for the additional cost (charging time is ~2 hours).
- Maximum snow depth 40 cm
- We recommend installing extra batteries to increase the distance

Battery capacity, Ah	20	27	32
Battery capacity, Wh	1044	1566	2304
Voltage, V	60	60	72
